

**Submission for task 6.1.1 – COS300017**

**Duncan Mackay (101120310)**

1.

- a) As a user, I want to be able to see sunrise and sunset times in the future, so that I can plan when to arrive to take photos
- b) As a traveling user, I want to be able to generate a table of sunrise and sunset times and email them to myself, so that I can have a hard copy of this information
- c) As a user, I want to be able to check Sunrise and Sunset for a specific location and time, so that I can plan when to see these events
- d) As a user, I want to be able to use the GPS location to find sunrise and sunset times without the need for data and be able to export this information to a text message, so that they can plan with others.
